Wertvolles Papier führt den hohen Standard doch weiter, und bau diese Linie weiter. Also nur Hengste, wo man sicher ist, dass die nicht drei-jährig gipfeln, wie das in Deutschland mittlerweile immer öfter passiert *hust hust*. Ich könnte wetten, dass die ein bisschen Mechanik vertragen kann. Da haben die Dänen, v.a. Hesselhoj, ein paar

Challenges

Breeders ask more and more for reliable health data of stallions

Challenges

- We don't have enough reliable data about older horses in terms of:
 - Rideability traits
 - Ability for top sport
 - Vices etc.
- We can only be really good if we are close to the riders and the sport because much of the information is collected in practice between the horses, within the sport.

Thanks for your attention
